GR5 Titanium Wire (6AL - 4V), Grade 5 Titanium Wire, 6AL4V

Titanium Wire

•

•

•

•

•

Place of Origin:Shaanxi, China (Mainland)

Brand Name:Yunch

Model Number:YZ-Ti-wire

Application:Industrial

Standard:ASTM b863

Diameter:0.8-6mm

Grade:Grade 5, gr5, ti 6al-4v, ti 6 4 titanium alloy

Ti (Min):99.5%

Product name:gr5 titanium ti 6al-4v titanium wire grade 5

surface1: sandblasting,pickling

certification1: ISO9001-2008, SGS

color:metallic

shape:straight&spool&coil

Coating:As the request

Feature:Corrosion resistance

Products Specifications:

GR5 Titanium wire (6AL - 4V), grade 5 titanium wire, 6AL4V titanium wire.

info@yunch.tech

Titanium Grade 5 is the aerospace grade and is not cold formable, so it is used more often when no forming is needed. Grade 5 alloy will have ultimate tensile strength at and above 895 Mpa.

Wire is often used with the goal to get really close to the final dimensions of the part being made. The material is worked to the closest size of the desired part and the grain structure of the finished piece is more homogenous. Titanium wire is often used as a heat barrier because titanium stops the heat and does not transfer to the rest of the assembly.

Titanium wire grade 5 have ballistic properties making it great for driver protection in racing.

Applications of product

- Oil drilling equipments
- Industrial precision instruments standard parts
- Medical instruments standard parts
- Aircraft engine
- Machinery, electroplating equipment
- Titanium wind leaf in power used
